Our services include implementation & maintenance services (Erp, mobility). We have multiple domains: manufacturing, supply chain, retail, financial institution, real estate, education, it and professional services.

Logicon CoE

Logicon Concept Around the 4 Pillars

Data	People	Process	Technology
			
Establish the Enterprise Information Management (EIM) Foundation	Shift Focus From IT Centric to Business Centric	Understand Where You Are	Assess New Technologies Proactively
Implement Master Data Management (MDM)	Plan for Changing Roles and Skill Sets	Measure and Communicate the Value of Business Analytics	Assess User Needs and Expectations
Assess and Address Changing Data Needs	Balance Business and IT Skills and Resources	Establish Process for the MDM Program	Design and Build a Flexible Data Strategy and Architecture
	Sustain an Ongoing Partnership Between the Business and IT	Consistently Support an Analytical Culture at All Levels	Architect and Build a Flexible Business Analytics Tool Environment
